**Limited Exception for Boundary Rules:** If an offeror's facility is on either side of a district boundary, is within visual distance from that boundary, and is easily accessible from that boundary, they may submit to provide towing services in districts located on either side of that boundary. The intent of this exception is to provide those businesses with locations immediately adjacent to a boundary the flexibility to provide towing services in the areas they currently service near their place of business and within their "home" community. If it is decided that a business is attempting to bypass the intent, or otherwise abuse this exception to be considered for a particular district, they will be excluded from that district.

Offerors are advised that the above changes affected the pagination of the RFP & offerors must download the latest revision.

All other terms and conditions remain unchanged.
